

FLAT RELIEF EMBLEMS

The appearance of a plaque can be enhanced by the use of emblems. They can also help to express beliefs, ideas and feelings in a way that may not be possible in words. There are two types of emblems: **Flat and Bas Relief**

> Flat Emblem

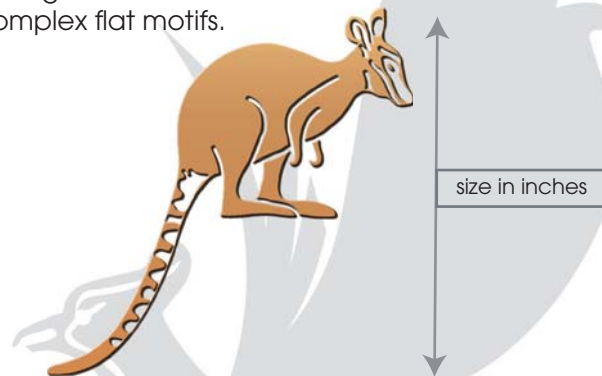

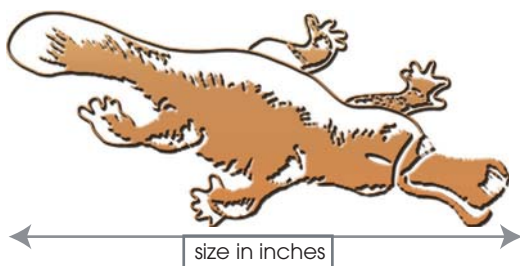

These emblems are created in our design software. The surface is finished to the same height and appearance of the inscription letters.

> Bas Relief Emblem

These are created by our sculptor in a three dimensional shape. The irregular surface is highlighted in bronze on the plaque providing an emblem with depth and perspective.

Flat Emblems can be positioned anywhere on the plaque and the size can be varied infinitely in any orientation. The size of the emblem is specified in inches by the largest of the vertical or horizontal dimensions. A minimum size of 1.5" may apply to some more complex flat motifs.

Phoenix Foundry has a database containing in excess of 3000 emblems. Others can be designed from scratch or from client supplied artwork.

Visit www.phoenixfoundry.com to search our complete Emblem (Motif) Library.

Some emblems in our data base may be protected by copyright, permission to use them from the copyright owner may be required. Normally, permission is granted for memorial use.
